IphoneNative

iPhone Native

version :1.0.0

EXTERNALMODULE

ConfigurationReader

Configuration reader library to read and write XML configuration created by phresco

OCUnitReportGenerator

OCUnit report generator Library that generates Junit style report from OCUnit logger files. These sources needs to be added as sources for compilation available at ThirdParty/OCUnitReportLogger

SBJSON

A strict JSON parser and generator for Objective-C. It adds categories to existing Objective-C objects for a super-simple interface. More flexible APIs are also provided for added control.
